ABSTRACT

Bluestar (Beijing) Chemical Machinery Co., LTD. (BCMC) is a wholly-owned subsidiary of Bluestar under Sinochem Holdings, which was established in 1966.

BCMC is one of the world's patents and suppliers of ion-membrane electrolyzer complete equipment technology with independent intellectual property rights. It has an annual output of 3 million tons of full set electrolyzers and anode and cathode electrodes with a production capacity of 60,000 square meters each.

Relying on core technology of electrolysis and equipment manufacturing, BCMC is committed to becoming a science and technology engineering company featuring core equipment manufacturing + core process package development.
