ABSTRACT

Mr. Zhang Peichao is set to deliver an in-depth presentation focusing on the current state and future developments of China's chlor-alkali industry. He will provide a detailed overview of production technologies, highlighting advancements that have shaped the industry.

Furthermore, his talk will emphasize critical aspects of environmental protection and safety protocols, showcasing initiatives aimed at minimizing ecological impact and ensuring workplace safety.

The discussion will also touch upon strategies for enhancing the sustainability of chlor-alkali production in China, including innovations and collaborations designed to meet global environmental standards.
